

## Register your organisation for free quit smoking support for clients

Non-Government organisations who support people experiencing disadvantage (e.g. homelessness, unemployment, economic stress, mental health concerns) can partner with the Queensland Quitline service to provide clients access to free quit smoking support. The program is delivered over the phone and provides multiple support calls and free nicotine replacement therapy (patches and gum or lozenges).

If you are interested in registering your organisation, complete the form below and a Quitline worker will contact you to assess your organisations eligibility for the program.
